

# This is Gretta!

---

Gretta is pretty 2 year old sable GSD. Gretta's early life was very unpleasant as she was tied outdoors to a tree all day every day. Her "Micky Mouse" looking ears are from severe horse fly bites that a neglectful previous owner did not address. The dead tissue on her ears had to be surgically removed. We think she looks kinda cute.

As part of her evaluation, Gretta has been through an in-kennel training program and has done wonderfully. She is obedience trained and attends group training to practice her obedience 5 days a week. She loves working obedience and would love to attend classes with her new family.

Gretta is a people dog. She LOVES people and is very good with children; she used to live with two little girls. Families with older children will be considered.

Gretta has a prey drive and being tied to a tree probably contributed to it. Because of this we will not place her in a home with small animals. She does not do well with female dogs but may do well with a large male dog with an adopter committed to slow and proper introductions and training. We can help with that.

Gretta's ideal home will be a family with GSD experience. We really want Gretta to have a new life with a family that will focus on her.

Gretta is house trained, crate trained, spayed, and up to date on vaccines.

If you are interested in Gretta or know anyone who would be, please complete and adoption application and email it to [adopt@germanshepherdcenter.org](mailto:adopt@germanshepherdcenter.org).

Applications can be downloaded from our website.

Thank you so much for considering GSR&RC ...it's all about the dogs.
